

# Climate Hackathon 2022

HACK THE CLIMATE FOR A SUSTAINABLE FUTURE

TEAM-TWILIGHT

DEEPAN

KAVYA

# ROOT CAUSE

01 Changes in the atmosphere

---

02 Natural processes

---

03 Volcanoes eruption

---

04 Tectonic plate movement

---

05 Human activities – that releases “greenhouse gases” into the atmosphere

---

# Microsoft Cloud for Sustainability is growing

## Unify data intelligence

Gain the visibility you need to improve sustainability reporting and help transform your business.

## Build a sustainable IT infrastructure

Identify opportunities to replace your tools, systems, and activities with more efficient options.

## Reduce the environmental impact of operations

Track and minimize the environmental footprint of your operational systems and processes.

## Create sustainable value chains

Enhance accountability across your value chain, from sourcing materials through product distribution.

# Solution Outcome

## Microsoft Cloud for Sustainability

### Automotive

Connect people, products, and processes with technology that supports automotive sustainability.

### Energy

Explore Microsoft technologies that help drive the global transition to cleaner energy.

### Financial Services

Accelerate transformation, manage risk, and add value—while creating a more sustainable future.

### Manufacturing

Drive sustainability while reducing costs and improving safety in your manufacturing operations.

### Retail

Improve energy management and reduce your environmental impact with innovative retail technologies.

### Infrastructure management

Optimize the ways in which buildings, campuses, and cities consume and deliver resources.
